## Transport policy

### PRODUCTS WITH NON-STANDARD VOLUMES.

The general conditions do not apply to all products with dimensions exceeding 160 cms in length and 225 cms in height, and the price of transport must be requested from the Operations Department.

PLEASE NOTE THAT PARTIAL SUBMISSIONS ARE NOT ALLOWED. Only in the case of Management Approval will partial shipments be made. Or if the customer pays for the partial shipment and it is approved by Management with the confirmation of the cost applied for that concept in the invoice to the customer.

The logistics rates are calculated with delivery by lorry without a platform (standardised shipments), on the understanding that for this type of shipment the recipient must have means of unloading. If such means are not available, additional costs will be applied depending on the shipment and its needs, which should be borne by the buyer. These rates are valid for areas with easy access for trailers. All that is mountain, beach, pedestrian streets and delivery on upper floors could have a surcharge to be assessed according to the volume and the population to be assumed by the buyer. On the other hand, shipments en route may not change their original address. Any modification will imply a surcharge which will be requested before proceeding to make the final delivery for validation.

Any breakages caused by transport will be paid for if they appear on the carrier's delivery note or, failing this, if VILAGRASA, S.A. is notified within 24 hours of receipt of the goods.

## Attention!
